

OUTLINE of the contents of the holiday practice in internal medicine

The aim of the holiday practice in internal medicine is to let student know about running of the hospital internal ward and the junior physician's duties on the ward.

The next purpose of this training is to give the student an opportunity to deepen or to achieve some clinical skills, whereby all tasks are to be performed under the junior physician's control.

The procedures done by the student during the placement will be confirmed by the respective health care institution in THE LIST OF PRACTICAL PROCEDURES.

1. The student will be trained in physical external examination by the patient's bedside, and in taking history with special emphasis laid on its accurate executions.
2. The students have to manage blood taking and all kinds of infusions and transfusions.
3. They have to master blood taking technique and the examination of blood count, erythrocyte rate and the chemical examination of urine and urin sediment.
4. ECG examination is to be performed, apparatus attendance techniques and results evaluation are to be acquired.
5. The students are to be acquainted with the indications and blood transfusion proper – they must be personally present at:
 - the performance of the cross test
 - the performance of the identity test
 - the performance of the biological testThe students have to learn correct administration and documentation in blood ordering and transfusion proper.
6. The students have to familiarize themselves with the methods of stomach and duodenum probe insertion, stomach washout, further with the exudation puncture indications and techniques.
7. According to the programme the students will take part in day and night admission duties under the junior physician's control.
8. As far as possible, they will take part in electrocardiogram description in the department and in the ward rounds.
